

Deeksha Manjunatha Bankapur

857-961-6753 | manjunathabankapur.d@northeastern.edu | linkedin.com/in/deeksha-manjunatha-bankapur | Boston, MA

EDUCATION

Northeastern University

M.S. Computer Science — GPA: 3.5/4.0

Boston, MA

Aug. 2025 – Dec. 2027

Dayananda Sagar College of Engineering

B.E. Computer Science — GPA: 3.7/4.0

Bangalore, India

Aug. 2021 – May 2025

- Relevant Coursework: Algorithms, Database Management Systems, AI & Machine Learning, Deep Learning, NLP, Statistics, Probability Theory

TECHNICAL SKILLS

Languages: Python, SQL, Java, TypeScript, JavaScript, C

Web & Backend: React, Node.js, Express.js, FastAPI, Socket.IO, REST APIs, MongoDB, PostgreSQL

AI & ML: PyTorch, TensorFlow, scikit-learn, LangChain, LangGraph, RAG, Prompt Engineering, LLMs

Tools & Platforms: AWS, Docker, Git/GitHub, Azure DevOps, CI/CD, MLflow, Databricks, Agile, Jira/Confluence

EXPERIENCE

Data Science Intern

Mevi Technologies LLP

Oct. 2024 – Jan. 2025

Bangalore, India

- Designed end-to-end AI workflows using Python and PyTorch to automate analysis of structured and unstructured clinical datasets; applied feature engineering and statistical modeling to generate actionable insights for cross-functional stakeholders.
- Tracked experiments using MLOps practices and CI/CD pipelines, improving pipeline efficiency by 25%; built anomaly detection workflows and maintained dashboards in Tableau and Power BI for cross-functional stakeholders.

Full-Stack Developer Intern

Archelos Intelsense Technologies Pvt. Limited

Feb. 2025 – May 2025

Bangalore, India

- Built automated data pipelines using AWS (Lambda, S3) and REST APIs to ensure reliable, reproducible data workflows; collaborated with cross-functional teams and contributed to well-documented code repositories.
- Developed and deployed REST API endpoints and full-stack features using JavaScript and Python; integrated LLM-based tools to automate internal workflows, reducing manual processing time and improving team operational efficiency.

PROJECTS

AlgoLearn | React, Node.js, Express.js, TypeScript, MongoDB, Canvas API, WebSocket, JavaScript

Jan. 2025 – Present

- Co-built a full-stack platform end-to-end with production-ready REST APIs and Node.js backend services; deployed and maintained data pipelines supporting high-volume real-time data access across internal and external systems.
- Wrote clean, well-documented code following software engineering best practices; collaborated cross-functionally using agile workflows and contributed to code reviews to ensure reliability and scalability at scale.

Mental Health Monitoring System | Python, PyTorch, TensorFlow, XGBoost, Flask, AWS

Aug. 2024 – Present

- Designed and deployed production-grade agentic AI pipelines for healthcare informatics; built and evaluated LLM-based classification models using RAG and multi-agent orchestration techniques, achieving 87% accuracy — IEEE Published, 2024.
- Performed data curation, feature generation, and model benchmarking across sequence and contextual features; delivered well-documented reproducible code and analysis summaries.

Heal I/O | React, Node.js, Express.js, MongoDB, JavaScript

March 2026 – Present

- Built self-service workflow automation tools end-to-end — designed data pipelines with full CRUD support, built API-driven dashboards enabling non-technical users to track health metrics and generate doctor-ready PDF reports.
- Implemented automated notification pipelines and API-driven reporting workflows; maintained reproducible, well-documented data systems for chronic illness patient adherence tracking.

CERTIFICATIONS & PUBLICATIONS

Publication: “Multi-Modal AI for Mental Health Monitoring” — IEEE Conference Proceedings, 2024

Completed: Azure Data & AI Fundamentals (Ernst & Young), Google Data Analytics (Coursera), Process Mining Fundamentals (Celonis)

In Progress: AWS Cloud Practitioner, DeepLearning.AI ML Specialization (Andrew Ng)
